Professional Summary

Frontend Software Engineer specializing in design systems and accessible web interfaces. Proven track record in driving platform-wide WCAG 2.2 AA compliance and delivering measurable performance gains. Experienced leading frontend development in agile, cross-functional teams at the intersection of design and engineering.

Work Experience

Senior Software Engineer, SoFi - Dec 2016 to Nov 2025

- Owned and served as technical lead for the React component library end-to-end. Driving all architectural decisions, roadmap planning, and governance across 50+ components adopted by 95% of frontend applications, from customer-facing products to internal tooling. Ensured every component met WCAG 2.2 AA standards, supported dark mode, and aligned with the design system, reducing redundant implementations across 8+ product teams and driving UX/UI consistency platform-wide.
- Architected and led the consolidation of multiple frontend projects into a single repository, unifying dependencies to reduce KTLO costs, reduced technical debt, and accelerate development velocity across teams.
- Drove platform-wide WCAG 2.2 AA compliance through accessibility improvements and team training, boosting Lighthouse scores by up to 20%, reducing LCP by 2s, and improving CLS.
- Led frontend development of the new members dashboard, achieving an 11x engagement boost by surfacing key account insights and optimizing load performance via new backend service integrations.

Web Designer, Abbi Media - Nov 2013 to Nov 2016

- Designed and launched diverse websites ranging from dynamic e-commerce platforms on WordPress to engaging blogs and static HTML sites, achieving an average client satisfaction rate of 90%.
- Delivered comprehensive support, maintenance, and promotional materials including print production, driving brand positioning and optimal user experience across client engagements.

Advertising & Design, Choteau Acantha - June 2010 to Nov 2013

- Spearheaded weekly advertising design and production; implemented Adobe InDesign as the primary design tool, streamlining workflows and enhancing design capabilities.
- Led seamless migration of the website to TownNews Blox CMS, ensuring uninterrupted functionality while conducting comprehensive staff training.

Skills

Languages: JavaScript, TypeScript, HTML5, CSS

Technologies: React, Next.js, Styled Components, StyleX, Jest, Vitest

Tools: Git, Figma, Supernova, Adobe Creative Cloud

Education

Bachelor of Applied Science (BAS), Web Technologies - Bellevue University, May 2016

Associate of Arts and Science (AAS), Graphic Design - Northwest College, May 2009
